

COZY TABLE

Restaurant

About Our Project

This project is a responsive and dynamic restaurant website built using Angular 17 as the frontend framework. It features a modern, user-friendly interface for customers to browse the restaurant menu, place orders, and make reservations. The website is designed to be fast, scalable, and easy to maintain, offering both the best user experience and performance.

PROJECT FLOW:

2. WIREFRAMES/ UI DESIGNS

Design intuitive wireframes and visually appealing UI for a seamless user experience.

4. TESTING

Performed unit and end-to-end testing using manual testing to ensure functionality and fix bugs.

1. RESEARCH REGARDING THE PROJECT

Understand project requirements, including menu management and user interaction features.

3. DEPLOYMENT

Deployed the Angular project on a local server using Angular CLI and tested it in a web environment for functionality and performance.

5. FINAL PROJECT

Developed a fully functional restaurant management system with separate customer and admin dashboards, menu browsing&management, order&table bookings, and feedbacks section.

TECHNOLOGIES USED:

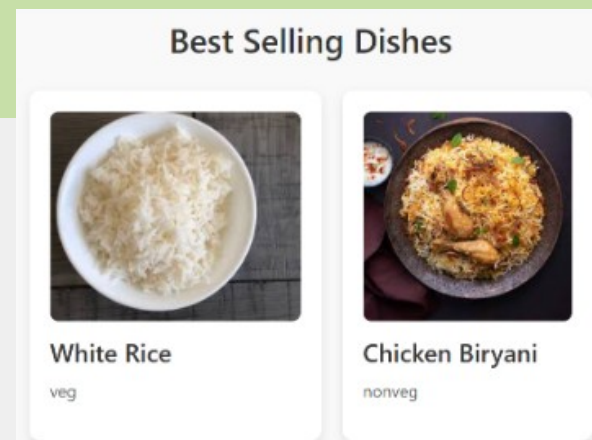

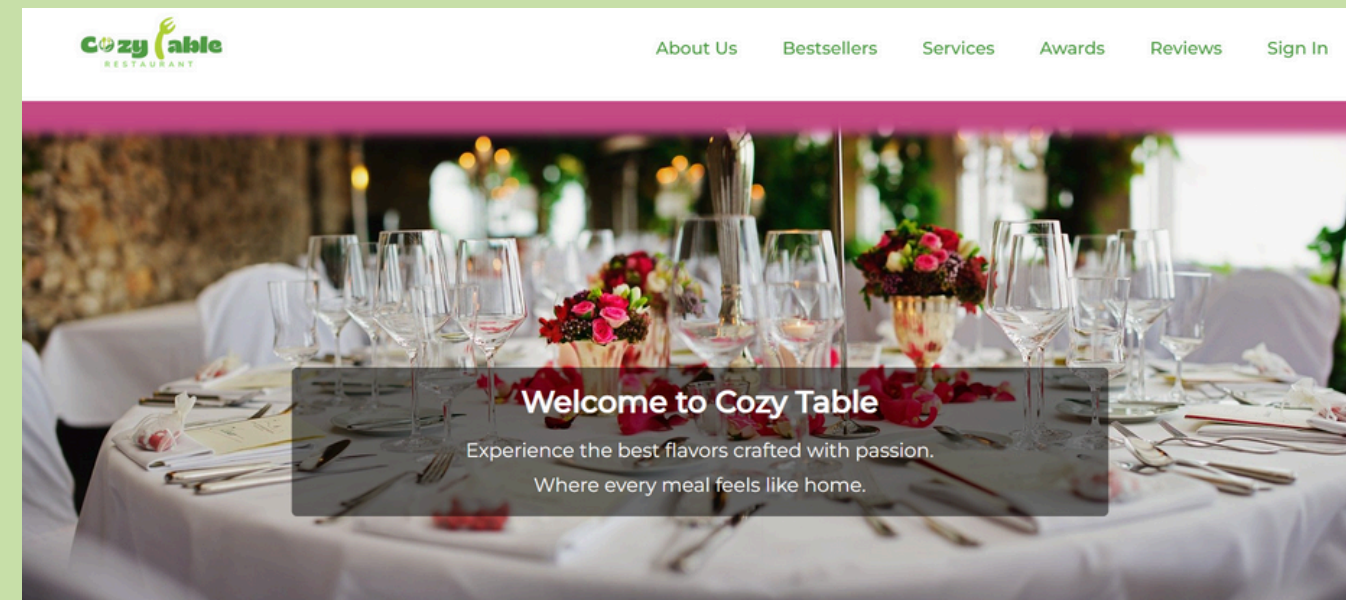

TOOLS USED:

Landing Page

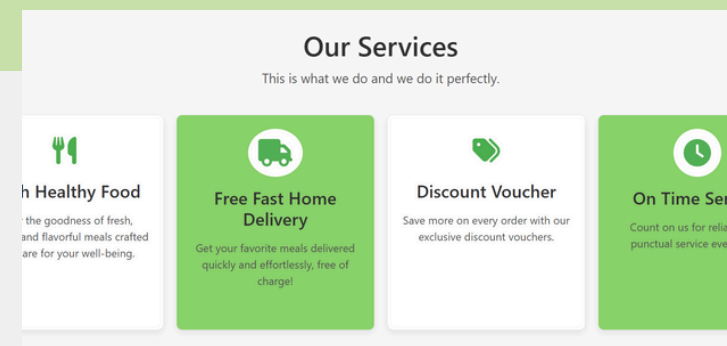

Team 2

Sathya,Prakhar,Gayatri,Sai sampath

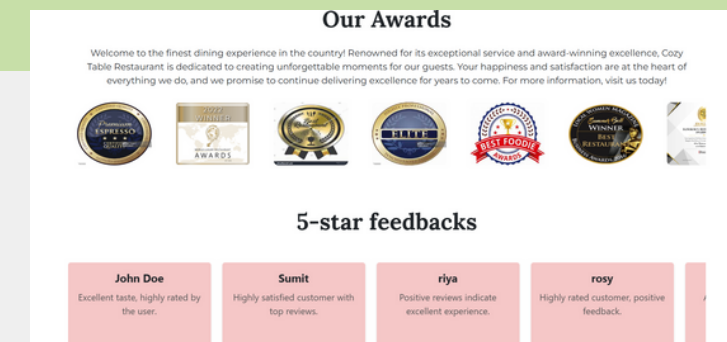

Best Selling Dishes

- Displays top dishes dynamically with images and descriptions.
- Enhances customer engagement by showcasing popular menu items.

Our Services

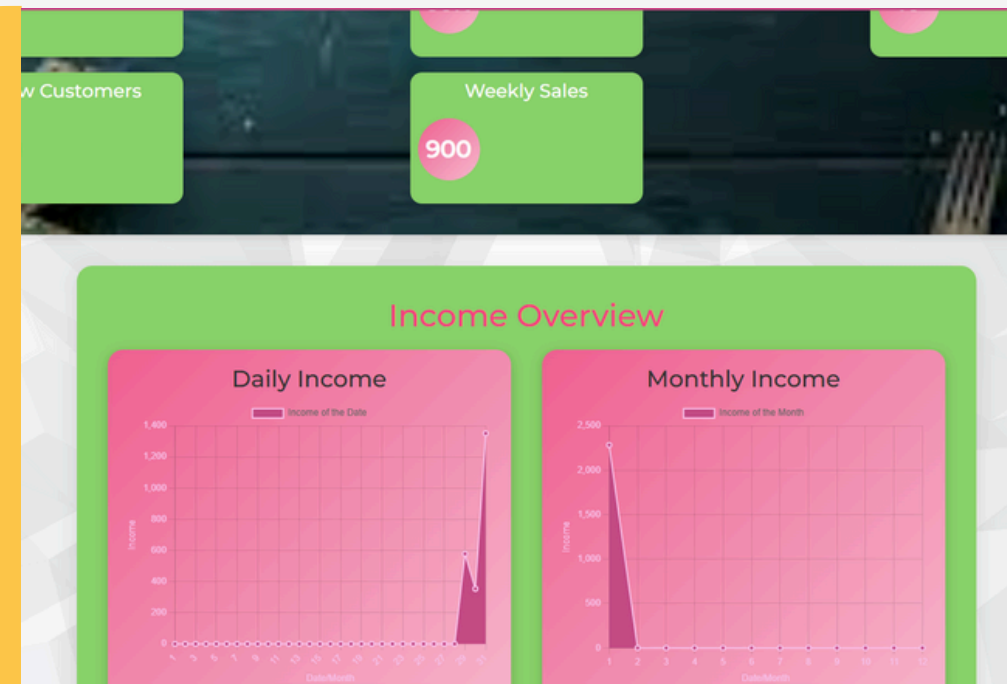

- Four key services: Fresh Food, Fast Delivery, Discounts, & On-Time Service.
- Icon-based layout for quick readability and a visually appealing design.

Our Awards & best Feedbacks

- Showcases restaurant achievements & recognition.
- Displays 5-star customer feedback dynamically, improving credibility.

Admin Dashboard

- Displays total daily and monthly income with interactive graphs.
- Tracks most sold menu items.
- Shows user reviews for insights.
- Efficient menu management for smooth operations.

Kshitij
Kinjal

Dashboard Pages

Customer Dashboard

- Browsing shortcuts and personalized recommendations.
- Real-time order tracking.
- Total orders and spending.
- Sales graph for popular items.

Authentication

Team 1
Sumit kumar Dubey

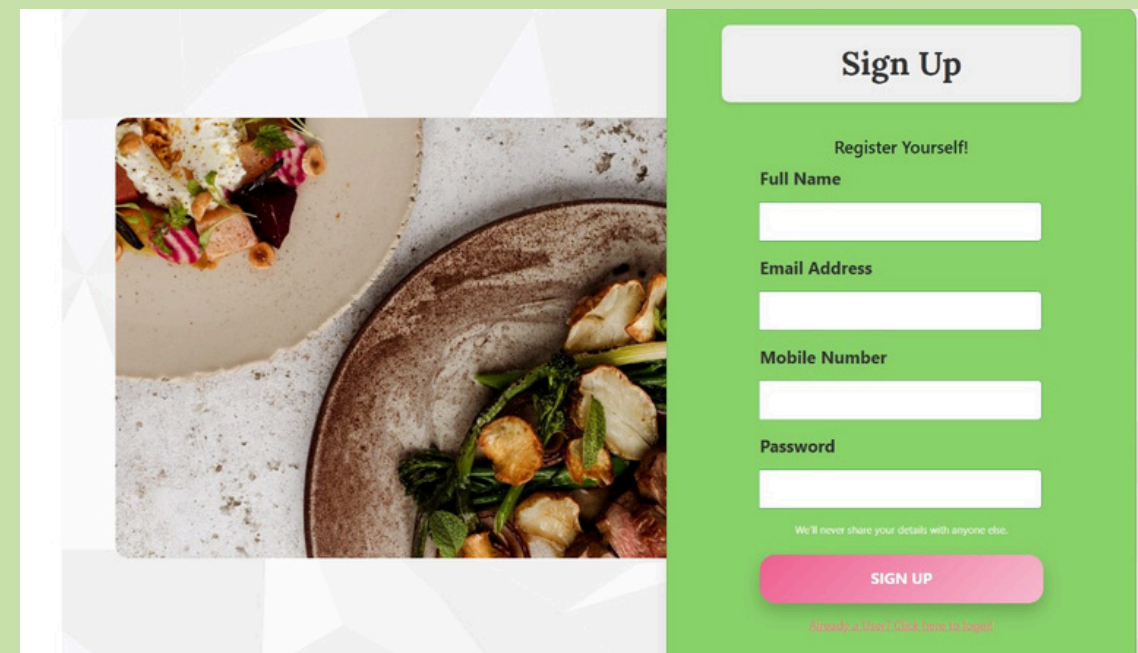

Overview

The Sign Up and Login page offers a seamless, secure authentication process for users and administrators, with an intuitive interface and strong security. Administrators can easily manage users and settings, ensuring a smooth authentication flow.

Key Features(sign up)

User Registration

- 📌 Full Name – Enter your complete name for identification.
- 📌 Email Address – Provide a valid email for communication.
- 📌 Mobile Number – Register with a verified mobile number.
- 📌 Password – Secure login with a strong password.
- 📌 Submit Button – Complete the registration process easily.

A mockup of a 'Sign Up' form. The form is titled 'Sign Up' in a white box on a green background. Below the title, it says 'Register Yourself!'. There are four input fields: 'Full Name', 'Email Address', 'Mobile Number', and 'Password'. Each field has a small red pin icon to its left. Below the input fields, there is a small line of text: 'We'll never share your details with anyone else.' At the bottom, there is a pink 'SIGN UP' button. To the left of the form is a placeholder image of a dish.

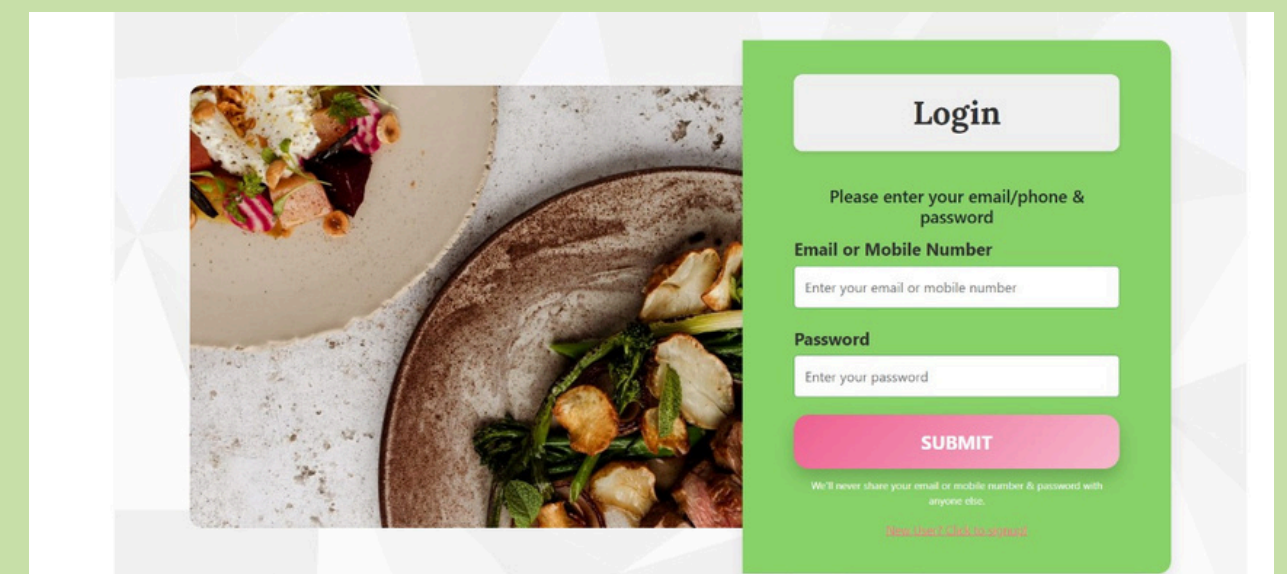

Key Features(login)

User Login

- 📌 Email/Mobile Number – Log in with registered credentials.
- 📌 Password – Ensure secure access with authentication.
- 📌 Submit Button – Quick and seamless login process.

Admin and User Login

- 👤 Admin Login – Manage users, monitor activities, and control settings.
- 👤 User Login – Access personal accounts, order history.

A mockup of a 'Login' form. The form is titled 'Login' in a white box on a green background. Below the title, it says 'Please enter your email/phone & password'. There are two input fields: 'Email or Mobile Number' and 'Password'. Each field has a small red pin icon to its left. Below the input fields, there is a small line of text: 'We'll never share your email or mobile number & password with anyone else.' At the bottom, there is a pink 'SUBMIT' button. To the left of the form is a placeholder image of a dish.

Reservation & Table-Management

Team 2

Sathya,Prakhar,Gayatri,Sai Sampath

Overview

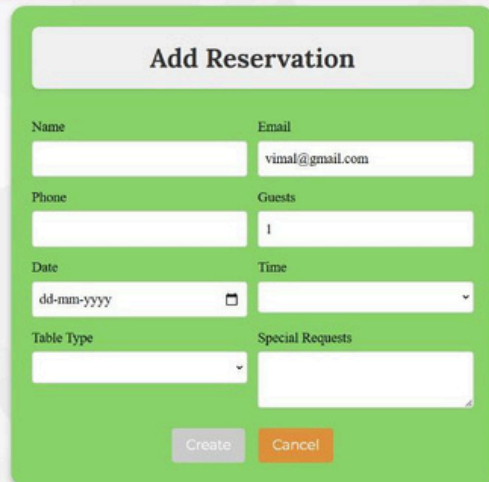

Reservation and Table-Management segment is designed for seamless booking experience & efficient management.

With Hassle-free reservations for Customers.
Automated bookings to ease Staff workload.

Structured. Efficient. Stress-free dining!

Table Reservation

- Captures name, contact, and preferences for a personalized experience.
- Prevents overbooking with table limits.
- Ensures bookings are within certain time range to avoid customer's discomfort.

The 'Add Reservation' form is a green-bordered box with a white background. It contains the following fields: Name (text input), Email (text input with 'vimal@gmail.com' pre-filled), Phone (text input), Guests (text input with '1' pre-filled), Date (text input with 'dd-mm-yyyy' placeholder and a calendar icon), Time (text input with a dropdown arrow), Table Type (dropdown menu), and Special Requests (text area). At the bottom are 'Create' and 'Cancel' buttons.

Reserved Table List

- Admin interface to view and manage reservations.
- Options to edit or delete bookings.
- Filter and sort by date, time, or by table type for easy management.
- Quick search by customer name or reservation number.

The 'Reservations' table is a green-bordered box with a white background. It features a 'Sort by Date' dropdown and a 'Search Reservations...' input field. The table has columns: Name, Email, Phone, Date, Time, Guests, Table Type, Requests, and Actions. The Actions column contains 'Edit' and 'Delete' buttons for each row.

admin feedback list

CONCLUSION:

This project provided us with practical experience in Angular development, UI/UX design, and data management. We faced and resolved real-world challenges, improving our problem-solving skills and preparing us for future industry projects.

ACKNOWLEDGMENT:

We extend our heartfelt gratitude to our mentor and Infosys for their invaluable guidance, support, and the opportunity to work on this project. Their mentorship has been instrumental in enhancing our technical skills and understanding of real-world Angular development.
